

Managed Portfolio Service

At a Glance

- ▶ Actively managed
- ▶ Aims to maximise returns achievable within your individual risk profile
- ▶ Diversified, multi asset portfolio service
- ▶ Lower dependence on individual asset class; combination of conventional and alternative asset classes
- ▶ Customised benchmark approach
- ▶ Regular portfolio reviews to adjust and adapt the portfolio requirements to your needs
- ▶ Delivered via a pooled investment fund.

Overview

The Managed Portfolio Service is a progressive approach to investing where pooled investment funds (the Managed Portfolios) are designed to meet your specific investment needs.

We listen closely to you to understand exactly what you are hoping to achieve and the level of risk that you are prepared to accept to meet those goals. Through working with you, we develop a detailed understanding of you, your tolerance to risk and your investment time horizon. We use our understanding of your attitude to risk, investment objectives and circumstances to identify and recommend an investment solution specifically for you.

Your selected Managed Portfolio aims to maximise the returns achievable within your chosen risk profile.

The multi-asset Managed Portfolios use a combination of both conventional and alternative asset classes. Regular portfolio reviews are undertaken to adjust and adapt the Managed Portfolio objectives to your needs.

The service uses customised benchmarks, rather than standard industry benchmarks. Therefore, we have the freedom (where appropriate), to invest in a wider range of investment instruments than may normally be used.

The Managed Portfolio Service is offered to customers with investments of more than £150,000.

Highlights

Understanding your requirements – Through our risk tolerance questionnaire, we use sophisticated analysis to design a long term strategy to match your profile, based on a thorough evaluation of asset class volatility and returns.

Leading edge investment techniques – We bring you leading edge investment techniques to get the very best out of your investments. The Managed Portfolio Service provides you with access to many different types of both mainstream and alternative investments – some of which are not easily available to the private investor.

Risk and Return – Sophisticated analysis of risk/return characteristics enable us to identify possible portfolios that aim to maximise return for any level of risk. A skilful combination of investments with different risk/return characteristics can make a significant difference to performance.

Flexibility – As a flexible service, your investment strategy can be modified over time to keep pace with your changing circumstances. Investment in a wide range of investment instruments means you benefit from a greater diversification of risk.

Investment Process

Once we have determined the best long term framework for your investments, your Managed Portfolio is constantly reviewed and actively managed. You have the reassurance of a disciplined investment process with in depth monitoring and controls.

This information is issued by HSBC Private Bank (UK) Limited, trading as HSBC Global Asset Management. For the information of the addressee only and should not be reproduced and/or distributed to any other person. *To help us to continually improve our service and in the interests of security, we may monitor and/or record your communication with us. There are additional risks associated with specific alternative investments such as private equity, hedge funds and commodities within the portfolios; these investments may be less readily realisable than others and it may therefore be difficult to sell in a timely manner at a reasonable price or to obtain reliable information about their value; there may also be greater potential for significant price movements. The value of investments and any income from them can go down as well as up and you may not get back the amount originally invested. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in established markets. Where overseas investments are held the rate of exchange may cause the value of such investments to go down as well as up. HSBC Global Asset Management is a trading name of HSBC Global Asset Management (UK) Limited and HSBC Private Bank (UK) Limited. Both are registered in England at 8 Canada Square, London E14 5HQ and are authorised and regulated by the Financial Services Authority. Copyright © HSBC Global Asset Management 2009.
