

HSBC Corporate Money Funds Limited

US Treasury Fund

Marketing communication | Monthly report 31 March 2025 | Share class B

Investment objective

HSBC Corporate Money Fund aims to provide investors with security of capital and daily liquidity together with targeting an investment return which is comparable to normal, short dated US Dollar denominated US Treasury returns. The fund seeks to achieve this through investing in a diversified portfolio of US government money market instruments which the Investment Manager considers to be of high quality.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
