

## HSBC Global Investment Funds

# BRIC EQUITY

Monthly report 29 February 2024 | Share class M2C

### Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of shares from Brazil, Russia, India and China (including Hong Kong SAR).

### Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size, that are based in, or carry out most of their business in Brazil, Russia, India and/or China (including Hong Kong SAR).

The Fund can invest up to 50% of its assets in China A and China B-shares. For China A-shares, up to 40% through the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect, up to 30% in CAAPs and up to 10% in CAAPs issued by any single issuer.

The Fund may invest up to 10% of its net assets in other funds, including HSBC funds.

See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

## Risk Disclosure

- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Investor Information Document (KID) and/or the Prospectus or Offering Memorandum.
